Strong background in front end development, with a focus on responsive design, performance optimization, and modern web technologies. Successfully delivered numerous projects by collaborating with cross functional teams to meet client requirements and exceed expectations. Dedicated to staying updated with the latest industry trends and continuously enhancing skills to provide cutting edge solutions. Proactive problem solver with a keen eye for detail and a commitment to on time project delivery.

### Skills

#### Hard Skills

JavaScript, React, Node.js, Express, MongoDB, MySQL, HTML, CSS, Tailwind CSS, Bootstrap, , Firebase, GSAP, AOS, dasiUI, MatrialUI

#### Professional Tools

VS Code, Figma, Vercel, Netlify, Git, Github, Postman

#### Soft Skills

Communication, Team-building, Time Management, Client Management, Organizing

### Experience

#### Front end Web Developer | TOJO Global ,Dhaka

(July '24 - Dec '24)

- Development and maintained user-friendly website while customizing features to meet client needs . Managed technical issues, resolved performance problems , and ensured seamless functionality across projects. Handled data management and integration between front-end and back-end systems to optimize workflows . Utilized JavaScript , React , MongoDB, MySQL , WordPress , Node.js and Express to build scalable, efficient web applications.

#### Executive & Developer | Intern | ISBAH IT,Dhaka

(July '23 - may '24)

- Led team management efforts, overseeing website and software development projects to ensure high-quality outcomes and client satisfaction. Customized software solutions to meet client-specific requirements, providing tailored functionality and seamless integration. Executed client management strategies, maintaining strong communication and delivering on project expectations. Utilized tools and technologies such as HTML, CSS, JavaScript, and MySQL to develop robust and efficient software applications.

## Education & course

Web Development Course With Programming Hero | ID:WEB10-0163

95% | (July'24 – Dec'24)

Hons Department of Zoology | Affiliated Dhaka University, Dhaka

(Feb '21 – present)

XII (HSC) | Bera Govt. College , Bera ,Pabna

GPA:4.43 | (2018 – 2020)

## Project

### TOJO Global agency website & Admin Dashboard || Live

- Gained hands-on experience in building a scalable digital marketing platform using cutting-edge technologies like React, Node.js, Express, and MySQL.
- Backend Development and API Integration. designed and implemented secure and efficient backend systems with Express, MySQL data handling.
- Developed a fully responsive website optimized for mobile, tablet, and desktop using CSS , Bootstrap, and modern UI libraries.
- Tools & Technologies Applied: React, React Bootstrap, CSS, Axios, Formik, React Icons, AOS, Node.js, Express, MySQL, Multer, Git, Nodemon, ESLint , Admin Panel, Material-UI, Ant Design, Jodit Editor.

### Amazing data filter Admin Dashboard || Live

- This is a comprehensive data-filtering web application that allows users to add, update, delete, and search various types of client data efficiently. Users can easily locate client information using criteria such as name, mobile number, or location. The system is designed to be effective and user-friendly, simplifying client data management tasks.
- Backend Development and API Integration. designed and implemented secure and efficient backend systems with Express, MySQL data handling.
- Tools & Technologies Applied: React, Tailwind CSS, Axios, Formik, React Icons, Node.js, Express, MySQL, Ant Design, Jodit Editor.

### Crowdcube Winter donation website || Live

- Crowdcube is a modern crowdfunding platform built with React, Node.js, MongoDB, and Firebase. It offers responsive design, dynamic campaign management, secure transactions, and real-time notifications. Hosted on Firebase and Vercel, it ensures reliability and scalability for users.
- Backend Development and API Integration. designed and implemented secure and efficient backend systems with Express, MongoDB and JSON Web Tokens (JWT) for authentication and data handling.
- Tools & Technologies Applied: React, Tailwind CSS, Axios, React Icons, Node.js, Express, MongoDB , jwt, firebase , vercel .
